SUMMARY

Master's student in Data Analytics and Artificial Intelligence with hands-on experience in AI, data science, and software engineering. Experienced in designing and implementing data-driven and AI-based projects, with strong problem-solving skills and a solid technical foundation. Interested in working on impactful research and real-world computing challenges.

EDUCATION

Master of Excellence in Data Analytics & Artificial Intelligence Faculty of Sciences, University IBN ZOHR, Agadir	september 2025 – Present
Licenciate of Excellence in Data Analytics & Artificial Intelligence Faculty of Sciences, University IBN ZOHR, Agadir	september 2024 - july 2025
Diplôme Universitaire de Technologie (DUT) in Computer Engineering Higher School of Technologie of Agadir, University IBN ZOHR	september 2022 - july 2024

PROJECTS

CERN Dimuon Event Analysis — Personal Project

- Performed machine learning analysis on dimuon events from CERN Open Data, including regression, classification, and anomaly detection.
- Implemented using **Python**, **Pandas**, **scikit-learn**, **NumPy**, **Matplotlib**, and **SHAP** for model interpretation.
- Gained experience handling large-scale scientific datasets and experimental data.

Monte Carlo Simulation & Model Validation — Personal Project

- Generated synthetic datasets using **Python**, **NumPy**, and **SciPy** for Monte Carlo simulations.
- Validated AI/ML models by comparing simulated data with experimental results.
- Strengthened understanding of scientific modeling, simulation, and data-driven validation.

Distributed Café Management System — University Project

- Built a full-stack software system to manage café orders, inventory, and analytics.
- Implemented using **Python**, **gRPC**, **Flask**, **Docker**, **SQL**, and **REST APIs**.
- Demonstrated software engineering skills, distributed systems knowledge, and application deployment.

Fashion MNIST Image Classification (AI / ANN) — University Project

- Designed and trained artificial neural networks to classify fashion images.
- Implemented with **Python**, **TensorFlow**, **NumPy** and **Pandas**.
- Showcased practical ML/AI application skills on real datasets.

EXPERIENCE

FullStackDeveloper Intern — ITINFODEV, Agadir, Morocco Apr 2024 – Jun 2024

- Developed a sales and profit management web application (frontend & backend) using **React** and **Laravel**.
- Contributed to a mobile app using **Flutter** for tracking employee commissions and sales.
- Collaborated with a team using **Git** and **API** testing tools in a production environment.

Web Development Intern — Caisse Nationale de Sécurité Sociale (CNSS), Morocco Jul 2023

- Designed and developed a web application for managing administrative files of insured persons using **HTML**, **CSS**, **JavaScript**, **Bootstrap**, and **PHP**.
- Built a public interface for users to track the status of their files using their identification numbers.
- Implemented backend logic and database interactions to handle file records and status updates.

SKILLS

- Programming & DataAnalysis:** Python, NumPy, Pandas, SciPy, SQL
- AI / Machine Learning:** scikit-learn, TensorFlow/Keras, Neural Networks (ANN, CNN)
- Data Visualization:** Matplotlib, Seaborn, Plotly, Power BI
- Deployment & SoftwareSkills:** Flask, Docker

CERTIFICATES

- Applied Data Science Lab - WorldQuant University
- Data Science Job Simulation – BCGX (Forage)
- Data Science Job Simulation – LLOYDS (Forage)

LANGUAGES:

- Arabic:** Fluent
- English:** Professional working proficiency
- French:** Professional working proficiency
